Power Notice

- Only standard two pin socket is available.
- This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of an electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician.
- Hold the plug but not pull the power line when you cut off power, otherwise, it may cause an electric shock or fire because of a short-circuit.
- Clean the dust on the power line and plug in a timely manner.
- If the power line is damaged, contact the manufacturer or professional engineer to replace it.
- Don't use the machine without installing filters.

Notice When Using The Machine

- Don't put anything into the air inlet or air outlet.
- Don't block the air inlet or air outlet.
- Don't put the machine close to or above a heating device.
- If it's smoking or emitting a particular smell, cut the power off immediately.
- If there are oil residues, flames, or chemical smells in the air or room, don't use the machine.
- Don't use machine in an environment filled with inflammable gas like hydrogen or natural gas to avoid an electric shock, fire, and other damages.

Usage Restrictions

- To reduce the risk of fire or electric shock, do not use this fan with any solid-state speed control device.
- Don't use the machine on uneven surfaces or a bathroom where there is high temperature or humidity to avoid an electric shock, fire, or other damages.
- Don't clean and use the composite filter repeatedly; clean the machine carefully because strong corrosive cleaners may destroy the surface of the machine.
- Use a soft cloth to clean the surface only, otherwise, it may cause damage.

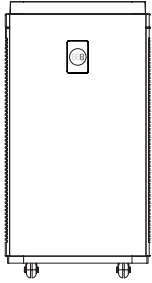

Cleaning Notice

- Don't use alcohol and organic solvent to clean, otherwise, it may destroy the product and cause an electric shock or fire.
- Pull the plug when you don't use the machine or clean the machine, otherwise, it may cause an electric shock or fire because of an electrical short circuit.
- Keep some space around the air purifier so that the wind flows fluidly to improve the purify efficiency.

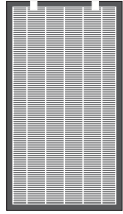

Tip Over Warning

- This machine is not suitable for the following people: disabled people, perceptual handicapped, mentally disabled or children.
- Children climbing is prohibited to prevent them from being injured caused by the machine falling.
- Turn off the machine and pull the plug when you move it.

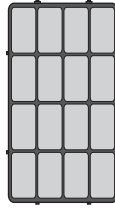

This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

User Manual

Power Cord

Product Components

1 Pre-Filter

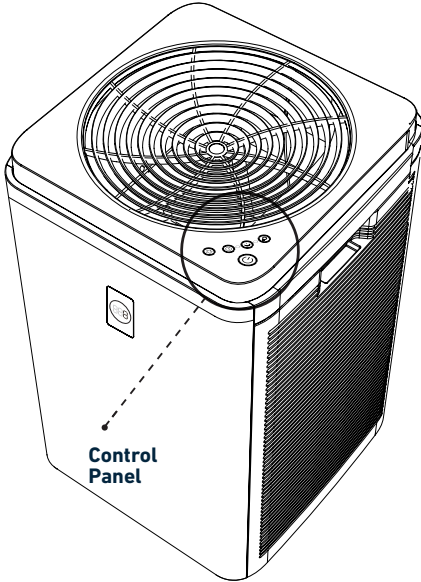

Captures large particles like hair, dander, debris, etc.

2 Composite Filter

H13 HEPA Filter: Removes particles from the air, including dust and smoke.

Activated Carbon Filter: Removes VOCs like formaldehyde and benzene and unpleasant odors like smoke.

■ CONTROL PANEL DIAGRAM

Turn the air purifier on/off.

Turn the front facing display on/off.

Press for sleep mode, which runs the machine at reduced power and low volume while maintaining air quality.

Press Sleep + Light keys together 3 seconds to turn on/off childlock.

Press to set a sleep timer, time options are shown on the front facing display.

Set fan speed manually. To enter auto-mode, press and hold fan speed button for 3 seconds.

Press these 2 buttons together and hold for 3 seconds to reset the blinking light that indicates the filter needs to be changed.

NOTICE

A. The device will turn off automatically when it's toppled past 30°, set it right and let it reset before manual shut off.

B. The "  " blinks white when it's time to replace your filter. This recommendation is based on hours used.

■ AIR QUALITY FRONT PANEL DISPLAY

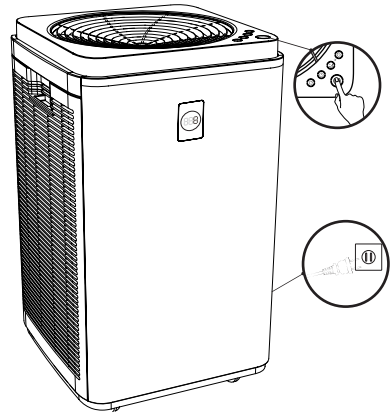

A precision laser sensor detects your air quality in real-time, reporting the true concentration of particulate matter (PM) in your air. Consistent with the Air Quality Index set by the EPA, a display on the top of the unit shows your live PM index reading, while a light strip on the front panel changes colors according to your EPA index score, so you can see the air quality from across the room.

● AIR QUALITY INDEX INDICATOR

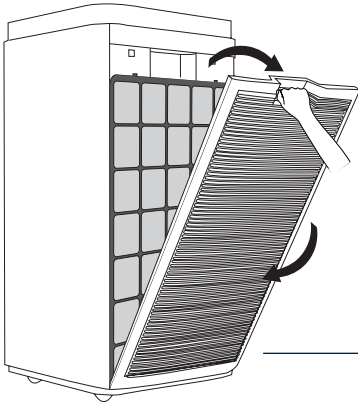

1. Touch “  ” to turn off the device.

2. Open the filter cover.

Hold the handle of the cover and pull it out.

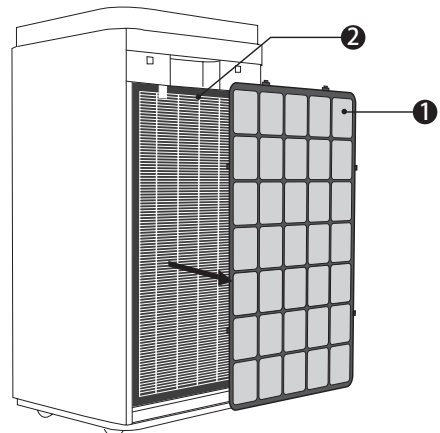

3. Take the filters out in proper order, put used filters into garbage bags to prevent contaminants from falling out.

1 Pre Filter → **2** HEPA Filter

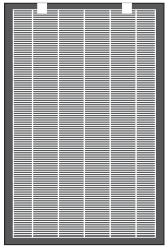

Notice:

- a. Filters are classified as nonflammable rubbish. Dispose of filters according to local regulations.
- b. Your mesh pre-filter can be used repeatedly, wash and dry your filter regularly for optimal performance.

4. When installing the filter, make sure it's facing the right way. It will fit snugly and easily.

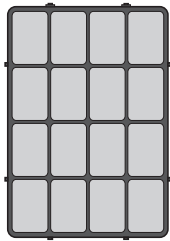

Filter Installation:
HEPA filter → pre-filter

HEPA filter
Face this side out

Extend the life of your filter by using a vacuum cleaner to occasionally remove dust.

For optimal performance replace your Hataspace filter three times a year.

Mesh pre-filter
Face this side out

The mesh pre-filter is washable, clean the filter more often if you have pets!

This filter does not need to be replaced.

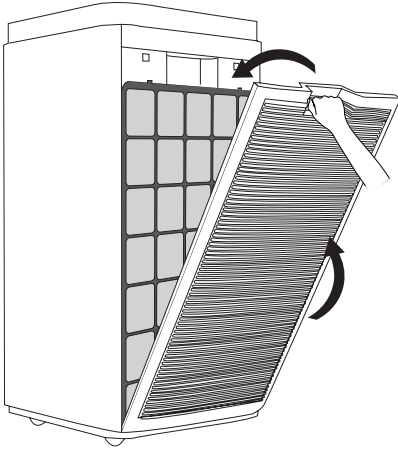

NOTICE

A. In a high use environment the filter will need to be replaced more often.

B. Dispose of filters properly according to local guidelines. HEPA filters are classified as "nonflammable rubbish".

5. To close the cover, match-up the slots on the bottom of the unit and cover so they align and click into place. Once the cover is closed, it is ok to turn the power back on.

6. Be sure to reset the “filter replacement reminder” after replacing the filters (please refer to instruction on page 07).

NOTICE

A. Please read the 'Filter Reset' instructions carefully to keep better purification (page 07).

b. Unplug the unit before cleaning.

c. Please keep the air purifier dry to prevent damage or electrical issues.

If your air purifier is having issues, please check these common problems first.

Problem	Reasons	Solution
The air purifier is not working.	<ul style="list-style-type: none"> A. The plug is disconnected. B. The front panel is not properly installed. 	<ul style="list-style-type: none"> A. Check and re-connect the plug. B. Reinstall the front panel.
